WEATHER FORECAST FOR SEA AREAS AROUND THE ISLAND DURING NEXT 24 HOURS

Issued at 05.30 a.m. on 07 February 2026

**DEPARTMENT OF METEOROLOGY
SRI LANKA**

COLOMBO - SRI LANKA

CONDITION OF THE RAIN

Showers will occur at several places in the sea areas off the coasts extending from Pottuvil to Trincomalee via Batticaloa. Showers or thundershowers may occur at a few places in the sea areas off the coast extending from Mannar to Pottuvil via Colombo and Galle in the evening or night.

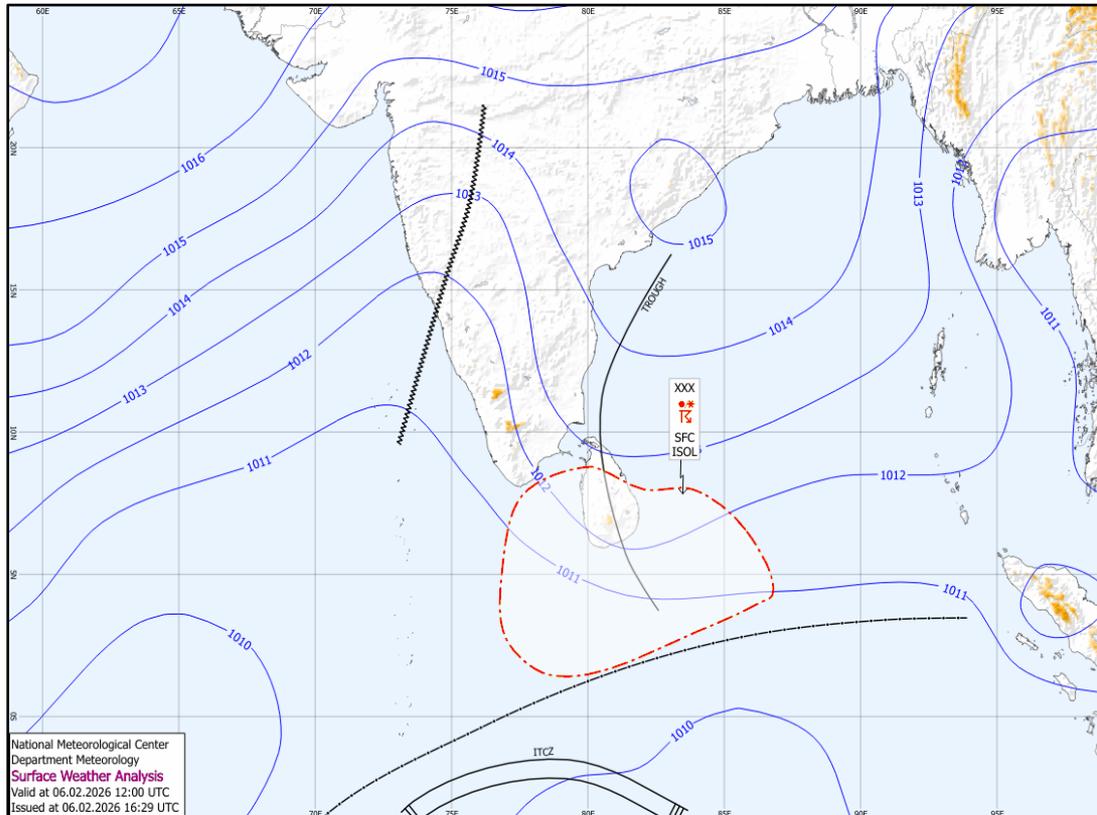

WINDS

Winds will be north-easterly and wind speed will be (30-40) kmph. Wind speed can increase up to 50 kmph at times in the sea areas off the coast extending from Colombo to Kankasanthurai via Puttalam and from Matara to Pottuvil via Hambantota.

STATE OF SEA

The sea areas off the coast extending from Colombo to Kankasanthurai via Puttalam and from Matara to Pottuvil via Hambantota will be fairly rough at times. Other sea areas around the island will be moderate. Temporarily strong gusty winds and very rough seas can be expected during thundershowers.

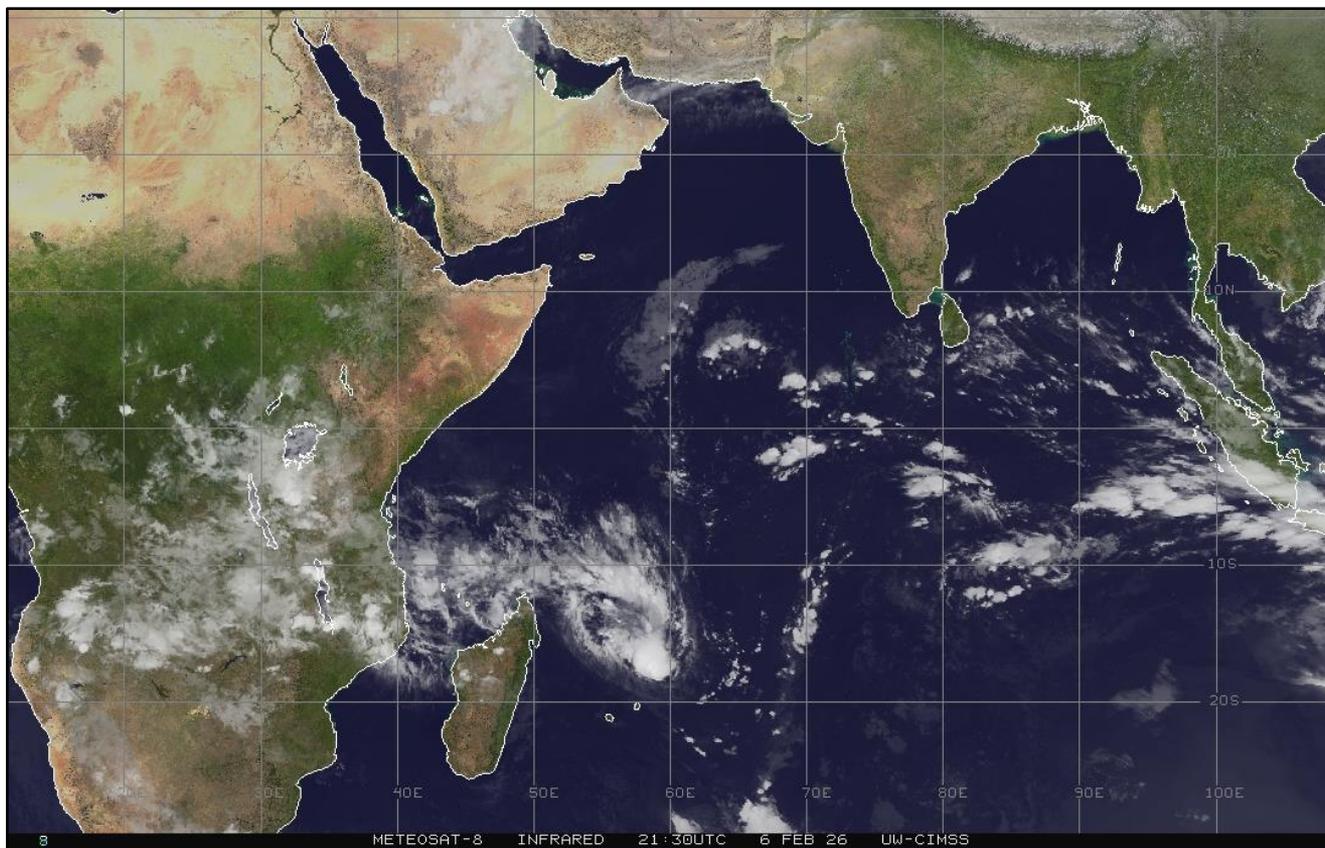

SURFACE ANALYSIS CHART

This analysis charts show the surface pressure pattern over Sri Lanka and the surrounding area. They display isobars (lines of equal pressure) and indicate areas of high (H) and low pressure (L) along with their central pressure value. Isobars are represented by solid blue lines, spaced every 1 hPa. High pressure is usually associated with mainly dry, settled weather with light winds, while low pressure is normally associated with unsettled weather, which is often wet and windy. The lower the pressure, generally the stronger the winds and the heavier the rain.

The map shows Coordinated Universal Time (UTC) and the local time is UTC+5.30.
